# Chapter 1. Internal documentation

The idea of this doc directory is to hold various piece of internal documentation; implementation notes really, that will help new people understand the code (as well as us old folks remember what we did).

Please feel free to contribute to this collection of documentation. Everything should be short and to the point; acting as a supplement to the javadoc (and maybe hyperlinked to it). Create the doc using what ever tools you feel comfortable with; but check in an HTML page (and the original source if the document is something you wouldn't want to maintain from a HTML page).

- Enhydra.Org Documentation

You can always find the latest documentation on Enhydra at the Enhydra site [<http://www.enhydra.org>].

- Enhydra Build Instructions ( [html \[build.html\]](#) , [pdf \[build.pdf\]](#) )

Information on how to build the Enhydra source distribution.

- Source Tree ( [html \[tree\\_structure.html\]](#) , [pdf \[tree\\_structure.pdf\]](#) )

Information on the layout of the Enhydra source tree.

- Database Manager Object Model [[database\\_manager\\_object\\_model.ppt](#)]

This is a PowerPoint slide showing the object model of the Database Manager.
